

Drum Clamps

Drum Clamp - Forklifts are utilized to deal with lifting, storing and moving pallets. For companies which deal with items inside drums, you must make use of an attachment to be able to store, move and lift them. There are numerous drum forklift attachments that you could get for all your drum storing and moving needs. These attachments are specially meant so as to deal with drum containers - hence there is no chance of damage to the item or drum container when they are moved, lifted or stored.

Drum Positioner And Grab

The drum positioner is accessible in three and four tine models. They are operational for the unloading and loading of drums off vehicles, drum stands and racks. This particular accessory is completely mechanical, hence enabling the one operating it to operate all from the comfort of the forklift seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This particular accessory is utilized for drum pyramid stacking.

The drum grab is fork designed and mounted with the sole objective of handling steel drums that have rolling hoops. Although the reason for the design was to handle steel drums with rolling hoops, the drum grab could accommodate the transporting of extra large and large plastic drums. Drum capacity maximum is 220 liters for plastic barrels and 210 for steel drums with rolling hoops.

The Rotator

The drum rotator is actually a lift truck accessory which mounts on to the blades themselves. The purpose of the drum rotator is to lift the drum and rotate it upside down. The drum fits in to the rotator utilizing a steel clamp that fits over the middle of the drum. The rotation is executed by either a continuous loop chain or a crank handle. The crank handle is intended for operations that take place below shoulder level. For operations that must take place above shoulder level, the continuous circle chain will be used.

Drum tines are simple fork mounted attachment which could be intended for unstacking or stacking 210-liter metal drums. Stacking involves nothing intricate, just easy horizontal positioning of the drums. The carriage-mounted attachments lessen the load center of the drums.

Automatic Tongs

Drum tongs are available both automatic and semi-automatic units that could be utilized in the open topped and tight head metal drum kinds. The drum tongs could also be connected several different ways to the lift truck. One way is to attach them underneath a fork-mounted hook. One more way is to attach them to a fork-mounted jib or a carriage mounted jib. Either the automatic and semi-automatic have a drum capacity of 210 liters. With the automatic, there is no requirement for the person operating it to ever leave the seat of the forklift.

Rim Grip Handler

Whenever drums require storage with inadequate area available, the Rim Grip Drum Handler is the best choice in drum forklift attachments. This particular attachment will work for both the 210 L drums as well as 120 L drums. The Rim Grip Handler operates by using metal jaws to be able to grab the edge of the drum. It picks the drum up and sets it down without requiring any room between all of the drums. The standard model in the industry is a zinc-plated handler, even though, this particular accessory is obtainable in stainless steel for the food and drink industry.
