

Aerial Work Platforms

Aerial Work Platform - There are numerous attachments meant for lift trucks that can be utilized to help expand the functionality of your lift truck and allow you to carry things, handle materials with out difficulty or to complete clean-up jobs.

Some accessories were particularly intended for the blades themselves. For example, blade extensions can be utilized when you require a lot more blade length, which increases lifting capability. Blade extensions come in lengths ranging from 48-120 inches. Rounded or triangular accessories are another kind utilized when transferring rolled material to be able to make certain it does not roll off of the traditional flat forks.

Examples of lifting accessories comprise pivoting and telescoping crane or boom attachments. They could come in several various kinds and are most often utilized for moving metal bars, lumber, poles and other types of bulky stuff. Other accessories like for example various styles of hooks and hook plates are existing to be able to pick up stuff utilizing a sling or chain. Magnetic lifters and slab lifters are other things that can be used along with hook accessories. Slab lifters are specialized attachments that are designed for carrying a variety of materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools that connect to your forklift in order to make moving rolls of carpet a lot easier. The attachment hooks onto the lift truck's forks and has a pole which goes through the middle of the carpet roll.

There are many types of forklift attachment designed for facility maintenance like for example snow blades. These industrial blades could be connected to front end loaders and meant for transferring materials like for example snow, dirt as well as mulch. Other popular cleanup accessories comprise standard sweepers and magnetic sweepers. Standard sweepers consist of a broom that the lift truck blades connect onto for sweeping large spaces such as parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal debris such as on shop floors for example. Sweepers have widths up to sixty inches and this surface area makes clean up simple and quick.

Material spreaders are other accessories utilized on forklifts. These spreaders are useful for a variety of applications like for instance spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Another optional lifting accessory are work platforms. These could be used by several various companies everyday. Platforms may vary in size from 36" x 36" to up to 60" x 60". A few models may be accessible and are capable of folding up and storing into a smaller place. Work platforms are designed to raise staff up to an overhead location with the use of the lift truck. Larger platform models have added space for staff so as to carry tools and other necessary objects meant for the task. Often work platforms are constructed of poly material or steel.
